ABOUT ME

Undergraduate student in Biomedical Informatics at the Federal University of Health Sciences of Porto Alegre (UFCSPA), with a focus on backend development and an interest in healthcare applications. I have experience developing personal projects and working as a volunteer intern, involving web application development, systems integration, and data analysis and manipulation. I mainly work with Java and SQL, while also using JavaScript for web applications and data visualization projects.

SKILLS

Languages: Java, JavaScript, SQL

Familiar with: C, Node.js, React.js, MongoDB

Tools: Git, GitHub, Jira

EXPERIENCE

BioCode Jr

Nov. 2025 – Present

Project Team Member

Porto Alegre, Rio Grande do Sul, Brazil

- Selected as a member of BioCode Jr, the undergraduate junior company of the Biomedical Informatics program at UFCSPA.

Levino

Aug. 2025 – Jan. 2026

Software Developer

Porto Alegre, Rio Grande do Sul, Brazil

- Volunteered in an academic-industry collaboration, analyzing athletes blood test data to identify injury risk patterns through biomarker analysis.
- Developed interactive dashboards and visualizations using React.js and Chart.js.
- Integrated front-end and back-end systems via APIs using Node.js and MongoDB.
- Enabled data-driven insights for performance monitoring and injury prevention.
- Currently part of the development team, contributing to the project when needed.

EDUCATION

Federal University of Health Sciences of Porto Alegre (UFCSPA)

2025 – 2029

Bachelor's Degree in Biomedical Informatics

Porto Alegre, Rio Grande do Sul, Brazil

- Relevant Coursework: OOP, Data Structures, Algorithms, Databases, Computer Systems
- Upcoming Coursework: Pattern Recognition, Medical Imaging, Introduction to AI in Healthcare, Computational Molecular Biology, Genomics and Phylogenetics

CERTIFICATIONS

Duolingo English Test

- Score: 125/160 (CEFR B2 - Upper Intermediate)
- Verify Certificate
